

Corporate Overview

OSI Federal Technologies, Inc. (OSI) is an ISO 9001:2015 certified, 8(a) Service-Disabled Veteran-Owned Small Disadvantaged Business (SDVOSB) that has been empowering Federal Government agencies since 1988 through innovative information technology support. Our mission focuses on understanding and addressing the unique needs of government agencies, ensuring they are equipped with the right tools to achieve their missions and objectives.

We recognize that government agencies operate in a fast-evolving landscape that demands robust, adaptable, and scalable technology solutions. OSI leverages strategic partnerships with major systems integrators to deliver IT systems that meet current requirements and anticipate future challenges.

Our expertise encompasses providing customized solutions that enhance operational efficiency, data management, cybersecurity, and inter-agency collaboration. This includes:

- > **Client Computing / Rugged Computing**
TAA-compliant solutions for diverse workforces, including rugged systems, lightweight laptops, tablets, and desktop workhorses.
- > **Cybersecurity**
We assist in implementing effective security postures at all levels. There are no more daunting frameworks- just clear steps and tangible results.
- > **Integration Services**
We deliver ready-to-use systems through a combination of services, including system imaging, kitting, hardware customization, inventory control, and customized logistics.
- > **Value-added Services**
We analyze technology landscapes and tailor solutions that deliver results. Our services include asset tagging, worldwide logistics, staged rollouts, and lifecycle management.

CORE COMPETENCIES
